SUMMARY

Full stack web developer leveraging a sales and customer service background to deliver client satisfaction through leadership and technical knowledge. I recently earned a certificate in full-stack development from Michigan state university, enhancing my skills in responsive web design, Javascript, React.js, Node.js, and MySQL. Collaborated on projects with one being a real-world full-stack application allowing users to add/delete their personal health goals and track their BMIs. I am passionate about coding because I can create something helpful that benefits people daily and affects their lives. My educational background in technology and passion for solving problems makes me a solid addition to any organization.
